

STANDARD

HDPE STICKS

- Manufactured from flexible HDPE, makes gradual bends without special equipment
- HDPE Sticks can be joined with a mechanical coupler based on size and applications (Shur-Lock II, Push-Lock, E-Loc, or Split-Lock +) or joined with butt fusion
- Excellent low temperature properties, allows installation in cold climates
- Outstanding long term cable protection from shifting ground, rock and root impingement
- Provides a permanent pathway, simplifies future cable repairs or replacement

INSTALLATION TYPES

Trench

SIZE RANGE AVAILABLE

2"	5"
2 1/2"	6"
3"	8"
4"	

WALL TYPES

SDR-9	SCH-40
SDR-11	SCH-80
SDR-13.5	

STANDARD COLORS

Sizes 2"– 6" 
Size 8" 

FEATURES

STANDARD

FOOTAGE MARKINGS Sequential foot or meter markings. Custom print streams available.

SPECIFICATIONS All Smoothwall conduit dimensions meet or exceed one or more of the following: ASTM F-2160, ASTM D-3350, ASTM D-2239, ASTM D-3485, NEMA TC-7, UL 651A, UL 1990, Bellcore GR-356.

OPTIONS

SILICORE® ULF (Ultra-Low Friction) is co-extruded inside the HDPE wall creating a slick, permanent, interior lining. With a coefficient of friction 60% lower than standard HDPE conduit without the aid of wet lubricants, SILICORE ULF exhibits no loss in performance over time or in extreme temperature conditions.

UL LISTING AVAILABLE from 2"– 6" for SDR 13.5, SCH 40 and SCH 80.

EXTERNAL STRIPES can be added from our standard color offering to facilitate visual identification.

UV PROTECTANT available for above ground exposure.

NOTES

- Bend Radius**

1/2" through 2 1/2"	Supported Bend Radius 10 times the OD	Unsupported Bend Radius 20 times the OD
3" through 6"	Supported Bend Radius 11 times the OD	Unsupported Bend Radius 22 times the OD
8" through 16"	Supported Bend Radius 18 times the OD	Unsupported Bend Radius 27 times the OD
- During cable placement, large sweeping bends are recommended over tighter bends. Pre-formed sweeps are recommended for conduit sizes 8" through 16" diameters.
- SWPS (Safe Working Pull Strength) is calculated using a 25% safety factor with the minimum resin tensile strength of 3,000 psi, the average OD and average wall thickness.
