Product Compliance Guide

This document outlines Dura-Line’s product compliance with The Buy American Act (BAA), which applies to purchases made by any federal government agency. The BAA requires contractors to deliver “domestic end products”, manufactured in the US, with at least 65% of the cost of components being domestic products.

However, this threshold is waived for “Commercially available Off the Shelf” (COTS) items, provided they are US-made and sold to the government in the same form in which they’re sold to the commercial marketplace (i.e., non-government customers).

Please note, BAA compliance requirements must be stated on your purchase order, otherwise compliance cannot be guaranteed.

If you do not see your product listed, it may not be compliant. For more information, please contact your local Dura-Line representative or email moreinfo@duraline.com.
