

DOT Buy America Requirements

Product Compliance Guide

This document outlines Dura-Line product compliance with The U.S. Department of Transportation's (DOT) Federal Transit Administration (FTA) "Buy America" requirements, which state that all manufactured products bought with FTA funding must be produced in the US and all their components must also be of US origin, unless the purchase value is under \$150,000.

Please note, BA-DOT compliance requirements must be stated on your purchase order, otherwise compliance cannot be guaranteed.

If you do not see your product listed, it may not be compliant. For more information, please contact your local Dura-Line representative or email moreinfo@duraline.com.

DOT Buy America Requirements
